Answer Key For Stages Of The Human Menstrual Cycle ...

The menstrual cycle begins when a girl reaches the age of puberty. It is the reproductive cycle that produces eggs for fertilisation. During the menstrual cycle the uterus (endometrium) prepares itself for implantation of a fertilised egg, if this does not occur the uterus lining is shed from the body; this is known as menstruation or a " period ".

The Menstrual Cycle - Pass My Exams: Easy exam revision ...

The menstrual phase occurs at the very beginning of the uterine cycle. It only occurs if no ovum is fertilised. The process begins with the breakdown of the corpus luteum which therefore ceases to produce progesterone. The loss of progesterone causes vasoconstriction of the spiral arteries supplying the functional layer of the endometrium.
