Energy Management Strategies For Hybrid

The energy management strategy in a hybrid electric vehicle (HEV) plays a very important role in the improvement of fuel economy and the reduction of

emissions. This chapter discusses several practical and advanced energy management strategies of an HEV. A rule-based energy management strategy is one of the most commonly used strategies in light to mild HEVs, especially in the early development stage.

V. ENERGY MANAGEMENT STRATEGY

The basic idea of a hybrid vehicle is to decouple the energy source (in the ICE and the BAT) from the energy utilization (in the wheels) by an intermediate stage (the IS). The energy contained in the fuel is transformed to mechanical energy
