### 7 Awesome Mountain Bike Maintenance Tips | Sacred Rides

If you do a lot of DH riding in wet conditions, you will want to check the status of your pads more often. Looking through the caliper with a white background helps see pad life. 2. Check shock/fork air pressure. Like tires, air shocks slowly lose pressure over time. 3. Check for chain wear or slack.

### How & When To Service or Tune Your Mountain Bike | evo

A dirty chain will sound gritty and crunchy. Inspect brake pads front and rear. Most pads have grooves in them, and you should see daylight looking through those grooves when looking from the top of the bike down through the brake pads. If your pads are so worn there are no grooves visible, they need to be replaced.
