BTEC Applied Science Fire Investigation | Teaching Resources

The investigator will generally begin with the area of least damage, allowing investigators to backtrack to the seat of the fire, which will typically be found in a more damaged region. Establishing the Origin A vital aspect of the forensic fire investigation is to establish the point of origin of the fire, also known as the seat of fire.

Fire Investigation - The Forensics Library

If the fire is a small fire within the house a fire blanket or water can be used to extinguish it. If you have access to fire extinguishers a water extinguisher is good for burning paper, wood or soft furnishings, a foam extinguisher is good for an arson fire, as petrol or other fuels would probably have been used.

Fire Triangle Science Essay - UKEssays.com

A forensic fire investigation involves the examination of all fire-related incidents following the extinguishing of them by firefighters. The investigation includes closely surveying the damaged scene to determine the origin of the fire, and then identifying the cause of it (Icove, De Haan, & Haynes, 2013). Forensic fire investigation is one of ...
